Creating the Card Bases from 12x12

Here is a quick way to cut three cards from a 12x12 sheet of card stock.

1. Trim off a 1" strip from one side and discard (this piece is now just for using as leftovers).
2. Cut a 4" strip down the opposite side so that it is a 4"x11" strip. Score in half to make a card that is 4"x5½".

3. With the piece that remains (8"x11"), cut in half lengthways to create 2 pieces equally that are 8"x5½". Score each one in half to make a card that is 4"x5½".
4. You now have 3 scored card bases ☺
5. Repeat this for each of the other two sheets of 12x12 so you have a total of 9 cards.

Take one diagonal piece and adhere to some grey DP so the diagonal edge is a little away from the edge of the grey. Use this as the benchmark to stick the other diagonal pieces.
